

FABRIART™

CUSTOM PRINTED ACOUSTICAL ART

Mosaic artwork printed on FabriSPAN®.

Acoustic Art Panels

FabriART™ by Fabri Trak Systems Inc. is a unique product that effectively combines acoustic performance and artistic imagery, transforming an acoustic wall or ceiling system into a work of art and art works into a visually beautiful sound solution.

With limitless design opportunities, including classic and contemporary art, corporate logos and commissioned projects, the attractive system provides the perfect solution to acoustic problems.

Create a masterpiece for your acoustically sensitive environment with a Custom Acoustical Art Panel.

Add an Artistic Touch

The seamless look of our artistic art panels will allow the perfect blend of creativity and purpose to any business or residence at an economical price.

The beautiful look of an Acoustic Art Panel does not have to be permanent. This system permits changing the art work surface as required.

How Art Panels Work...

FabriTRAK® is secured to the wall/ceiling area and infill is tacked inside. Then, the custom fabric, with directly printed graphics, is tucked and locked into the Fabri-TRAK frame works resulting in a lovely work of art, as well as top-notch in acoustical interior finishes.

No Limitations

Creativity has no limits and neither do Acoustic Art Panels.

This stunning and acoustically effective system can be applied to ceilings as well as curved and straight walls, all with the benefit of an enhanced acoustical performance.
